College in the Schools Program and AP Courses

The Class of 2016 has graduated from Lakeview with a head start on their college education. With our single-pathway instructional sequence we are ensuring that all of our students are following a rigorous academic pathway that develops their work ethic and provides them with many advantages over their peers at the college level. We offer college courses for college credit (40 credits) and advanced placement (AP) courses taught by our faculty on our campus. These programs are one of the many reasons LCA is becoming the school of choice in the Duluth area!
